

KAMINI UNIYAL

Aspiring AI/ML Engineer

+91 9528089827 | kaminiuniyal6@gmail.com | [GitHub](#) | [LinkedIn](#) | [LeetCode](#) | Dehradun, India

PROFESSIONAL SUMMARY

Final-year B.Tech Computer Science student (CGPA 8.43) with a strong focus on AI/ML through independent projects and coursework, spanning reinforcement learning, supervised classification, and automated document processing. Built a Deep Q-Network agent that mastered Flappy Bird gameplay, a loan-approval classifier benchmarked across three algorithms, and a resume-to-job matching tool used to generate ranked recommendations. Currently pursuing Infosys Springboard's Pragati: Path to Future program (in progress) and holds IBM SkillsBuild certifications in Generative AI and RAG.

EDUCATION

Uttaranchal University, Dehradun — B.Tech, Computer Science Engineering

2023 – 2027

CGPA: 8.43

SKILLS

Languages: Python, C++, SQL

ML & Deep Learning: Classification, Regression, Clustering, Reinforcement Learning (DQN), Neural Networks

Generative AI: Prompt Engineering, Retrieval-Augmented Generation (RAG), AI Agents

Libraries & Frameworks: PyTorch, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

Tools & Platforms: Git, GitHub, Jupyter Notebook, VS Code, Streamlit

PROJECTS

Flappy Bird Reinforcement Learning Agent (DQN) [GitHub](#)

Jul 2026

- Engineered a Deep Q-Network agent in PyTorch, training across 10,000+ episodes to achieve stable, autonomous gameplay through reinforcement learning.
- Built a 100,000-transition experience replay buffer and tuned a custom neural network with the Adam optimizer to accelerate convergence and stabilize training.
- Implemented an epsilon-greedy exploration strategy with decay from 1.0 to 0.05, balancing exploration and exploitation to raise sample efficiency.
- Increased agent survival time and cumulative reward through iterative reward shaping and hyperparameter tuning, deepening practical expertise in applied RL.

Tools: Python, PyTorch, Gymnasium, NumPy, YAML

AI Job Recovery Assistant [GitHub](#) | [Demo](#)

Apr 2026

- Designed a rule-based job-matching engine in Python that parses PDF resumes and surfaces the top 5 job roles aligned to a candidate's extracted skills.
- Built an automated resume-parsing pipeline with PyMuPDF to convert unstructured PDF text into structured, queryable skill data.
- Developed a skill-gap scoring system that computes match percentages per role and flags up to 3 missing skills to guide targeted upskilling.
- Delivered a functional end-to-end Streamlit tool bridging unstructured resume text and structured job-matching logic, strengthening applied NLP and recommendation-system skills.

Tools: Python, Pandas, PyMuPDF, Matplotlib, Streamlit

CreditWise Loan Approval System [GitHub](#) | [Demo](#)

Mar 2026

- Built a supervised machine learning pipeline in Python to predict loan approval outcomes across a 1,000-record dataset.
- Performed data preprocessing, feature engineering, and exploratory data analysis (EDA) to produce clean, model-ready inputs.
- Implemented and benchmarked three classification algorithms — Logistic Regression, KNN, and Naïve Bayes — evaluating each on Accuracy, Precision, Recall, and F1-score.
- Identified Naïve Bayes as the top-performing model with 0.80 precision, gaining hands-on insight into why precision-recall tradeoffs outweigh raw accuracy in high-stakes lending decisions.

Tools: Python, Pandas, Scikit-learn, Matplotlib

CERTIFICATIONS

- Data Analysis with Python — Infosys
- Getting Started with Generative AI — IBM SkillsBuild
- RAG for Enhanced AI Outputs — IBM SkillsBuild
- Build an AI Agent — IBM SkillsBuild

ACHIEVEMENTS & PROGRAMS

- Selected for Cohort 9 of Infosys Springboard's Pragati: Path to Future program — in progress.
- Participated in Ascent Quest 2026, a competitive coding challenge hosted by The Ascent Circle on HackerRank.
